

campusLan Software GmbH
Profile

The campusLan Software GmbH develops and distributes the pedagogical surface "CaLa vCE" for educational institutions. This network - solution contains an intelligent import of users, all pedagogical - didactical functions known at present on the market and a complete workstation - administration.

With "CaLa vCE" You can build combined networks, using standard clients and terminal-clients. Due to his scaliability it`s possible to administrate very extensive networks.

As our references we can name cities like Munich, Stuttgart, Hamburg, Berlin and many schools all over Germany. We are expanding at present in Austria and we have as well a partner in the Netherlands.

Over 14.000 clients and about 500 educational institutions are already installed with our solution for school-networks.

What`s simply convincing are low costs for following technical support and the complete transfer of know-how. So it`s simply assured, that administrators and teachers in schools can use and administrate the whole system on their own, if it`s wanted. Otherwise our 20 partners in Germany, Austria and Netherlands guarantee a professional support.

Additionally we offer a broad range of software - and hardware - products. campusLan software GmbH is partner for the educational sector of Samsung electronics GmbH, Novell Deutschland GmbH, Inetra.de GmbH, SEP AG and DATSEC ® Data Security e. K.

Thus our customers can obtain expert advice, all services, support and products which might play a role at schools as a complete package with reasonable prices by campusLan Software GmbH.
